Remarks :

This is a popular vessel that we manufacture in the range of Adagio Trawler Yachts. It is rare to get them secondhand but because of the superior build quality, they are retained by the owners for some time. We as manufacturers are always looking to get more listings of these boats. We have built 53 boats in the Adagio range and we are now taking orders for 2021 delivery.

This is a spacious easy to handle boat even when short-handed and is CE Category A rated so she is a full ocean-going vessel.

This boat is capable of voyaging long distances with a low fuel burn and can cruise from 5kts-18kts dependent on sea state and weather conditions. Typically you can cruise for many miles economically at 8-10kts. She is fully specced for you to take over and sail away and will give you many years of service.
