Mechanical and Rigging

The Sanlorenzo SL120A is powered by dual MTU 16V 2000 M96L engines, delivering exceptional performance with a combined output of 5,280 horsepower. These high-efficiency engines are renowned for their robust engineering. They offer a top speed of 27 knots and a cruising speed of 23 knots, ensuring a smooth and powerful ride even in demanding conditions.

The SL120A has advanced sound-dampening technology, minimizing engine noise and vibrations and providing a quiet and comfortable cruising experience. Designed for long-range voyages, the yacht boasts an impressive fuel capacity of 19,900 litres, optimizing endurance and efficiency on extended journeys.

These engines reflect the epitome of marine engineering, combining high performance with reliability and energy efficiency for an exceptional yachting experience.

Consumption 60l/h cruising speed
