Lowrance autopilot c/w WR10 wireless autopilot control
Lowrance interface to Yamaha engines
Wifi hub linking ipad/Depth/Chartplotter/ Yamaha engines/Sonic hub

Accommodation

Stepping aboard ‘Lady sea’ is via a gated access way on the aft starboard side. Two rear swim platforms straddle the twin outboards here giving way to a wide and comfortable gangway leading into the rear cockpit. The cabin itself is a true walk-around with the wide teak lined walkway leading up to the bow and back down the port side.

At the stern, the outdoor living area is vast and usable in every sense. Combined with the innovative sliding transom and seat arrangement, which increases space by way of a sliding mechanism once the outboards are deployed, you can generate much more space than equivalent boats in this class. The area consists of a lounge arrangement that covers three quarters of the stern, runs along the port side and ends with two smaller seats against the aft cabin window, the table cleverly doubles as a sun lounge.

A floor to ceiling glass door allows the skipper full vision from the helm position to the rear cockpit. The smart design continues inside with a dining table on the port side created by reversing the passenger forward facing seat and sliding it back against the companion way leading downstairs to the cabins. These seats are finished in grey upholstery while the table is a dark walnut again matched perfectly to maintain an up market feel. Underneath the rear seat, a slide out draw will fit any and all pantry items or cooking utensils. Immediately opposite is a functional galley with sink and 2-burner gas hob which would be enough for small trips up to a few days. A fridge sits underneath the helm seat which comes with a bolster and floor infill for standing.

The helm position is commanding offering an impressive view. The electronics are all laid out in an easy to see arrangement with a Lowrance unit and engine measurements taking pride of place. Trim tab controls are easily reached just sitting to the right of the wheel while the radio sits to the left. The switch panel is situated on the bottom right of the helm adjacent to the keys.

Three steps lead down to the cabins and head compartment. On the port side, a functional double cabin is light filled courtesy of the porthole which is quite long and includes a hatch to allow fresh air into the cabin. There is also small cupboard space here all finished in wood trim.

Move to the starboard side and you will find a well-appointed head with a quiet flush electric toilet, sink and storage space. The faucet doubles as a shower head and the entire room doubles as the shower saving space for other areas such as the main cabin which sits at the bow.

Secured behind a sliding door, the main cabin is large, light and spacious courtesy of the large portholes running along the hull. The bed sits in the centre of the room with storage underneath and a cupboard providing the necessary hanging room.
