Large Hydraulic aft swim platform which descends below the water line to facilitate the easy launch and retrieval of the tender.

The Prestige Pacific 170 hull/deck and superstructure is constructed entirely in steel.

The steel is the same material used in merchant ships.

Her hull design incorporates bilge keels which protect the props, allowing her to dry out if necessary.

Floor timbers, spars and reinforcements with thickness of 8mm, 6mm of the hull, topsides and superstructure 4mm.

Great attention was taken to the acoustic insulation of the entire boat, ensuring reduced

vibration

Windows are made with double glass.

The interior features extensive use of fine woods like mahogany.

The teak decks use 18mm wood

Interior with satin mahogany and cream coloured alcantara suede fabric
