Reasons to buy a Scarab jet boat

What are the benefits of choosing a Scarab Jet Boat? Jet Propulsion Performance The

Legendary Rotax 4-TEC Engine is the most proven technology in jet propulsion. With over 550,000 currently in operation and three power levels from one proven block. **Direct Power**

Gives You Maximum Power Unlike a conventional prop engine, which pushes water in a dispensed pattern, Rotax Jet Power concentrates thrust. An onboard impeller pulls water in and forces it out at a single point for maximum power. Less wasted engine power means more power in your throttle hand. **Advanced Safety** Scarabs are designed from the ground up so you will always enjoy a fun and care free days on the water. With Rotax® Jet Power, you do not need to worry about a propeller when swimming or skiing near the boat. You also have peace of mind knowing that your Scarab has a very shallow draft allowing you to avoid below water obstructions and the ability to safely navigate almost any part of the waters.

Closed-Loop-Engine Cooling Protects the engine from harmful salt, gunk and corrosion by

cooling it with clean coolant like a car. Like your car, every Scarab has a thermostat to ensure optimal engine temperature for engine reliability. **Drive Shaft Sleeve** Helps prevent the problem of wrapping debris, such as tow ropes and weeds, around drive shafts while other systems can only try to fix the problem after it occurs. **Lateral Thrust Control Delivers Quicker Reverse** Unlike other boats, which feature a small, plastic reverse gate, our aluminium reverse gate offers unmatched low-speed manoeuvrability to make docking a breeze. **Manufacturer Provided Description**

Twin 250-hp Rotax engines make this a jet boat that puts the pretenders to shame. And its smooth, stunning lines, premium metallic accents and chrome logos mean its performance won't be the only thing dominating attention on the water.
