Mechanical and Rigging

- Sewage tank capacity. I refer to the characteristics of the ship because I do not know that fact.
- When the batteries were changed, how many batteries do you have, and what year are they? Attached invoices.
- Do you mention that the ship was not used during 2020. It was not even used during 2021? Was maintenance done? During 2020 I enjoyed it in August and weekends from May to October.

Inventory

Next inspection AUGUST 15, 2022

Accommodation

Capacity max 12 p.

Remarks :

The owner says to recent questions asked "**2021-04-30 14:41:30**

A question was asked about the service history of the engines and how many hours had the engines done. The owner says " during February 2020 I had the engines completely overhauled, the cost being 40,000 euros.

I used the boat in August of 2020 the boat during and then different weekends from May to October. During the year 2021, I have not visited the boat yet. I hope to start visiting in May provided the pandemic restrictions have been lifted. by salesperson Rob(126)

Princess 500 motorboat just one owner from new. The engines were reconditioned. She has an 8.2 kW generator. The boat is of excellent quality and navigation, a planing hull with a maximum speed of 30 knots when the Hull is free from barnacles. She is very spacious, having a double seat in the skipper's position at the Helm. This Luxury Motor Yacht is upholstered in leather. Maintenance is continued except for this year 2020 of the covid crisis when she did not sail. Noble wood interiors, robustness and great settlement in the sea, both for docking and sailing in adverse conditions. A well-known manufacturer of the highest quality at an affordable price. The English-made hulls of these years are considered the best and most seaworthy on the market, even more than the current ones.
