Accommodation

A large double bed in the forward master cabin offers privacy and space. The high gloss wood finish is a major feature of this Flybridge Motor Yacht and is a testament to the build quality.

Remarks :

Part. Exchange for this boat is available with a semirigid of 6,50 or a boat of 12 meters.

The Guy Couach Flybridge Motor Yacht at 15 meters is a classic design. This boat is in very good condition and has rarely been used. A well-found deep V planing hull powered by twin Diesel engines to twin high-speed three-blade propellers on a conventional shaft drive system. Propellers are supported by well-found P-brackets located close to the rudders for optimum control at low speed. Power trim tabs operated from the helm flybridge allows a skipper additional stability control at high speed. Tabs can also be used to affect a positive wave angle in choppy sea conditions enabling more passenger comfort at lower speeds.

Flybridge power steering and engine throttle controllers will enable 360 vision for the skipper. A Flybridge concept is not challenged by single-deck sedan-style motor yachts. Helming from a flybridge in all conditions is preferred by experienced skippers, the addition of a sunshade

offers exceptional protection against summer rays. A GRP radar arch on the flybridge carries the radar dome and communication aerial.

Aft lower cockpit is high-sided for safety at sea a semi-integrated swim platform allows easy access to the water whereas the hydraulic Passerelle enables safe transit from this beautiful motor yacht to shore when stern mooring is adopted. The passerelle can also be used as a diving platform when at anchor.

Below deck of the Guy Couach Flybridge Motor Yacht. A well-proportioned lounge with a deep high gloss wood finish makes this space perfect for entertaining or chilling with your guests well into the night. 220v shore power from the dock/pontoon powers the boat and charges the 12volt battery system also allowing mains power outlets within the boat. The galley and large forward master bedroom are on a lower level with an en-suite shower and heads compartment via the companionway.

There is so much more to this beautiful Flybridge motor yacht than described in this specification. She is lying in Barcelona so please make an appointment to view her through any Network Yacht Brokers office. Flag is Polish

Last time the boat has been taken out of the water was summer 2020 for antifouling.
