Accommodation

2 cabins 1 head layout

ambience Jaguar upholstery in saloon

Remarks :

A Beautiful Jeanneau 39DS (2009 model) with an exceptional specification, including a bow thruster, electric winch air conditioning, and many other factory extras. Her current owner purchased her new in late 2008. The yacht was delivered and commissioned in the South of France, from where the owner sailed her to Spain, where she has been based. VAT was paid in Spain, and all the documentation is available for inspection. This yacht is in great condition and ready to sail, having just been lifted and prepared for use.

Comments from the owner:

"We have made calculations of engine hours from our logbooks. We keep detailed records of all trips we make on the yacht and are confident in this estimate. The total engine hours we calculated as 197 hours approx. The total amount of fuel that we have put in the yacht from new is 624 litres. There will be about 50 litres remaining in the tanks now. Therefore the yacht has used 574 litres from new. This equates to about 3 litres per hour which are in line with our estimate of engine hours from the logbooks. The engine hours meter on the tachometer does not seem to be working now but we had noted the engine hours a few years ago. Apparently, the failure of the engine hours readout is a common fault and the display may be possible to repair."
