Mechanical and Rigging

ENGINE

The engine is the original and has never had any major repairs. The exhaust elbow was replaced in 2017 and we replaced the timing belt and polished the tank and fuel. The speed depended a lot upon the wind speed and which course we were sailing. The top speed we hit was 7.8 Knots in 15-20 knot winds with the wind from the beam. We were in the Golf de Lyon and it was quite windy. Normally thought with 10 - 15 Knots we make between 4.5-6 knots.

MAKE Ford XLD 1800 Lancin Marine 4cyl

Serial no: 89116K566

No cylinder: 4

Last services: 2019

Hours to date: 1.900

Stainl. Steel replaced in 2006

Fuel Con(GPH):1

Rope

Type of Gear Box: StandarVP TX Single lever type.

Interior construction: Timber
Headroom: 4
Air conditioning (mobile) and cabin heating
The interior condition of the wood is very good
Interior height is 6ft 4 inches in the salon

Remarks :

A well-presented centre cockpit cruising boat. She has obviously built a great deal of care and attention to detail and has always been well maintained. Are you looking for a yacht that can take you anywhere in comfort and safety, or looking for the perfect life aboard? This is just a step aboard!

Look at the video below and fall in love with this yacht design by Van de Stadt and built by South - West - Steel Boats in Torpoint, Uk. Built-in 1993 commissioned in May 1994. The yacht is Austrian registered.

Her owner has been living aboard for many years, but now he has bought a house in Catalonia and it is time to sell the boat.

The boat was used as live-aboard and sailed 2-3x per year for day trips.

When the current owner bought the yacht he had a complete survey done by a well-respected surveyor who was specialized in steel vessels. The entire hull was checked. She was shot blasted and repainted at the time of purchase. The hull is 4 mm Corten Steel. The keel plate is 10mm and on the leading edge of the keel, there is a pipe.

The boat was sandblasted 4 years ago.
