Amel Super Maramu

Broker Remarks

Amel Super Maramu Yacht is a famous globetrotter. *Henri Amel & Jaques Carteau* designed *Paomia*. Built-in 1993 at Chantiers AMEL in La Rochelle, France. She has an impressive inventory that is all included for the very reasonable asking price. We feel she is ready to sail the oceans. Her condition on our inspection found her to be exceptional having been lovingly looked after by the owners. The running rigging was all replaced in 2016, and so was the Yanmar Diesel Engine 4J H2 55hp replaced in 2017. Engine hours on the replacement engine are very low. We are getting details of the work done when the engine was replaced. For further information about the specialist yacht builder and construction process of these beautiful and well-found yachts, please visit our manufacturer page.

Accommodation

The Wheelhouse

This is covered as is the helm because the cockpit is forward of the aft cabin. At the helm, you are offered shelter under a semi-hard top. Behind the cockpit below the deck is the aft cabin where the roof acts as a dingy storage area. The bathing platform along the side decks and the transom are very easy.

Below Deck,

The interior wood is build using traditional mahogany. During our inspection, we noted that the varnish it is in an exceptional condition throughout the yacht. Layout. Comprising of a conventional cruising yacht layout to port in the saloon, she also has a U shaped galley. Key features of the saloon are the fully retractable shelf with a single bed that slides out.

Starboard aft opposite the kitchen is a full-size navigation table. The forward cabin has a nice v berth, and it is convertible into a double. The owner's rear cabin has a full-size double bed with access along a single berth companionway. The back cabin offers excellent privacy to the ensuite heads. When all the beds are used this yacht can sleep eight in great comfort.

Rigging

Amel Yachts are built to a very high standard they can withstand most weather conditions giving great shelter at the helm. The concept behind the sail configuration is that they are easy to handle very quick to reef. An electric furling mainsail and furling headsail is a significant feature of this yacht. The furling motor is installed at the base of the main mast and forestay.

The furling Motor on the Genoa is mounted next to the sail this is very unusual. Sail System Furling Genoa with the motor mounted on the furling system Spinnaker and two poles Main Amel Electric Main Furling System Mizzen mast
