Remarks :

Halberg Rassy, few manufacturers have a reputation for building superb yachts of enduring quality. Kum was built in 1991. Her condition below is exceptional for a 30-year-old Yacht, this reflects the loving care of her two owners from new. The current owner bought her in 1996 and used the yacht very infrequently, always staying along the Spanish Coast. The yacht has never been used for charter. A reluctant sale by the owner who will personally accompany every viewing offers considered exclusively through Network Yacht Brokers.

Last time out of the water 11 august 2021 to pass ITB (Spanish inspection) until 2025 The hull is in perfect condition it has been cleaned with water pressure.
