2 showers

Remarks :

Arcoa Yachts are built in France. The French shipyard **Arcoa Yachts** was founded by the **Couach** family - hereditary yacht builders - in 1947. The company's history goes back 50 years: in 1897, the company Moteurs Couach, which **produced** marine engines, was opened. The shipyard stopped working. Arcoa Yachts was ahead of its competitors and became the standard of French shipbuilding style. The boats of the yard combine warm classics with modern technology and design.

This Arcoa Motor Yacht has been kept in proper good order. She is lying in Port Ginesta. An impeccable engine service has been done, with the change of filters, oil, new sillemblocs, new bilge pump, new outriggers and antifouling in March 2021. Refrigerator, air conditioning, microwave. It has been treated with special care since it was used as a home for the last year.
