Manufacturer Provided Description

A SLEEK AND INNOVATIVE DESIGN

With her new visual identity, the 40 immediately stands out. While faithful to the image of Lagoon's "DNA", a new style is born: an individual, streamlined and accomplished design depicts her large portholes and panoramic view. This creates a refined and high-performance unit, emphasised by the chamfer running from the bow to the stern. A new generation Lagoon, recognisable at first sight.

EXTERIOR: SPACE AND COMFORT

- A comfortable cockpit looking out to sea: a starboard dining table, able to accommodate up to twelve guests, a recreation area on the same side and seating at the rear beam.
- An ergonomic helm station accessible from the cockpit or deck, thus enabling communication between the skipper and crew at all times.
- Large aft transoms with a spacious swim platform, allowing simple access to the tender and safe, easy boarding.
- A forward cockpit, fitted with a sunbathing area, provides further living space.

EXTERIOR: SPACE AND COMFORT

- A comfortable cockpit looking out to sea: a starboard dining table, able to accommodate up to twelve guests, a recreation area on the same side and seating at the rear beam.
- An ergonomic helm station accessible from the cockpit or deck, thus enabling communication between the skipper and crew at all times.
- Large aft transoms with a spacious swim platform, allowing simple access to the tender and safe, easy boarding.
- A forward cockpit, fitted with a sunbathing area, provides further living space.

NEW GENERATION RIGGING: PERFORMANCE AND SIMPLICITY

A symbol of the new generation Lagoons, the 40 is endowed with advanced performance features: a VPLP hull structure and an increased sail area provide a better sail surface area / displacement ratio. The decision to position the mast step further aft, which stems directly from VPLP's experience in competitive sailing, provides this catamaran with multiple advantages: A self-tacking jib for simplified manoeuvres.

- A large forward triangle for a wider choice of downwind sails: a guarantee of performance.
- A shorter boom for ease of manoeuvring.
- A main sail, with a high aspect ratio, enabling the capture of better airflow in the upper parts of the sail for optimised performance.
- The re-centring of weight, thanks to aft positioning of rigging, considerably reduces pitching.

INTERIOR: ELEGANCE AND LUMINOSITY

- A selection of luxurious materials, by Nauta Design, enhances the new interior lines.
 - A wide choice of accommodation layouts to meet the needs of owners and large families: available in three or four cabins.
 - Large hull window glazing with integrated portholes in the cabin provide exceptional natural light and an outstanding view.
- Particular attention given to volume layout, smooth flow of circulation and luminosity makes this new interior a truly pleasant living area.
