Remarks :

Azimut S6 is the second model in the new S generation sports range from Azimut Yachts. Carbon plays the lead role, representing another milestone in the shipyard's pioneering research and development work. The combination of Carbon Tech and a propulsion system with three Volvo Penta IPS units puts the yacht at the forefront of technology in its category, with the ability to achieve high levels of fuel consumption efficiency combined with peerless handling and silent running. The sporty exterior design is by Stefano Righini, with the brand's iconic diamond-shaped deckhouse windows giving the boat an unmistakably appealing profile. The interiors are the work of Francesco Guida
